DETAILED ACTION

1. This action is responsive to restriction election received Sep. 4, 2009. Claims 1-11 and 66-67 were elected without traverse. The restriction is made FINAL.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-11 and 66-77 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,553,455. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-44 in the application are anticipated by claims 1-24 of U.S. Patent No. 6,553,455 (see *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993)).
3. Applicant’s arguments have been fully considered but are not persuasive. Applicant argues in substance that Patent ‘455 does not teach “setting a pointer for the linked stream to the same location as a pointer for the primary stream” as in claims 1-11 and 66-67.

In response, claim 1 of patent ‘455 recites a method for providing passed pointer detection in audio/video streams on disk media, comprising: determining when the

positions of the first and second pointers cross to create a passed pointer state; setting an indicator to signal that a passed pointer state has occurred. In addition, claim 4 of patent '455 recites "the method of claim 3 wherein the first audio/video stream is a primary audio/video stream and the second audio/video stream is a linked audio/video stream".

Therefore, claim 4 of '455 defines the first stream to be a primary stream and the second stream to be a linked stream. Also claim 1 of '455 determines when the pointer of the first stream and the pointer of the second stream cross, i.e. determines when the pointer of the primary stream and pointer of the linked stream is point to the same location. When the determination is made, claim 1 of '455 sets an indicator to create a passed pointer which indicates where the pointer cross. Therefore claims 1 and 4 of patent '455 teaches the limitation as claimed.

3. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
